**USER/INSTALLER RESPONSIBILITIES**

This certificate does not automatically constitute authority to install the item(s). Where the user/installer performs work in accordance with regulations of an airworthiness authority different than the airworthiness authority specified in block 1, it is essential that the user/installer ensures that his/her airworthiness authority accepts items from the airworthiness authority specified in block 1. Statements in blocks 13a and 14a do not constitute installation certification. In all cases aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.

Your Ref: 650200008	Our Ref No: WP61634	Test Required: N/A	
Part No: 67262-001-003	Description: Single Compartment Oven	TSN: N/A	CSN: N/A
Serial No: 131917	Workscope: .	TSO: N/A	CSO: N/A
DoM: 01-Aug-97	Overhauled:	Inspected:	
Removed From:	Serial No:	Reg No:	Position:

**Inspection Findings:**

Unit received in average condition. Tested and inspected; inspection revealed frame damaged, door seal compressed and worn, frame screws worn and rounded, oven contaminated with food residue and door panel sealant perished. Unit requires replacement parts, thorough cleaning, minor refurbishment and final full function tests in accordance with the CMM.

Overhaul requested. Unfortunately disassembly of Oven found that the element securing screws are seized in the Inner Oven attaching points. This does not affect the fit, form or function of the unit. However this means unit can not be disassembled for Overhaul without damaging the inner oven and possibly the element causing the unit to be BER. We strongly advise against this and that a repair is carried out instead of Overhaul.

Minor refurbishment carried out. Door panel resealed. Defective parts replaced. Unit cleaned and tested IAW CMM. Unit functions correctly.
